Further Explanation

Achieving one star master and helping others build to 1 star is not difficult if you understand how to build people. First, I really think, having the right script is important.

“Let me ask you, are you interested solely in purchasing and using products as a consumer? Or do you feel you might share your results and will try to build enough of an income to pay for your products?”

If you are thinking you will only use the products, let's get you on board as a product consumer/preferred customer.

Its easy and you will have your own store where you can buy products when you need them. I suggest you go on an auto delivery system, as I have found people don't think about ordering until it's too late and they run out.

I have found that natural type products like this do not work like drugs, they take 90-120 days to really achieve optimal results. Lets set this up for that period of time and after that, if you want I will help you cancel the order. If you think you will refer others, lets get you on board as a distributor.

There are a few things that are different than just being a customer. You get an additional 10% discount for starters. Second, the company will pay you a nice commission when others purchase products from your store. If you want to earn enough to get free product, think about this. You will earn 25% on every customer you locate, and 7% on every person you know who is like you and wants to get their product for free.

Further Explanation

For every 3 people you find who want to simply purchase product, you will find 3 who want to earn free product.

Let's say they all want to purchase \$100 in product. $3 \times \$100 \times 25\% + 3 \times \$100 \times 7\% = \$75 + \$21 = \$96$.

Do you agree, \$96 is close enough for me to say I have earned \$100. I like that. Who can't do that?

Plus, I will help you teach your 3 to do the same and you will earn an additional bonus on their people. 3% on their customers, 7% on their distributors.

If they each find 3 customers and 3 distributors like you did, that equals $3 \times \$100 \times 3\% \times 3 = \27 for the customers

$3 \times \$100 \times 7\% \times 3 = \63 . That's an additional $\$63 + \$27 = \$90$.

You basically will earn enough for you and one other person to take \$100 worth of product each per month.

I would like to show you how this can build over and over if you just simply help everyone find 3.
