

The A.G.E. Pill

Feel and look as youthful
as if you were 20 again.

Sisel[®]

The Age Pill's supernutrients accelerate

When we were very young, our bodies grew quickly. We had an abundance of stem cells. Stem cells are the master cells in our bodies that are able to transform into any type of cell that we need. As we grew, our stem cells divided and multiplied into the trillions of cells that make up an adult body, and replaced the cells in our body as they wore out.

As children, we had all of the energy that we needed to go all day long. This energy is derived from metabolizing glucose sugars. As our bodies break glucose down with oxidation to release the energy that powers the cells in our body, a plaque like residue was left over. This residue—known as glycation end products—accumulates over time, depositing an inhibiting coating over proteins, reducing optimal stem cell performance.

As the stem cells rebuild new cells and maintain themselves, Lipofuscin is formed. Lipofuscin is metabolic waste, a cellular sludge that clutters cells and greatly inhibits biological functions. Just like trying to cook in a dirty kitchen, it is difficult for your cells to produce the energy they need when all of the dishes are dirty and the trashcan is overflowing.

But what if you got some help to clean up the mess and dump much of the accumulated trash left behind by glycation and lipofuscin? Then your stem cells in the body should be free to function again at a high level. Scientists theorize it may well allow your body to again produce energy at the same levels as when you were in your prime.

Help combat the cellular-level health issues that occur as a result of aging, by increasing ATP—providing biological hydrogen to help amplify cellular electrical energy, and cleaning up cellular waste—allowing the cell to work at optimal levels.

your body's reversal of aging agents.

Aging is the result of decay and degeneration in our bodies. If we can slow or even reverse decay and degeneration by providing the proper nutrients, we should be able to slow and even reverse the effects of aging.

The AGE Pill provides specialized super nutrients to the stem cells, which enhance and allow the natural processes of the body to operate more efficiently... to do what you want to do, so you can be what you want to be. Now you can be revitalized, and feel as youthful as if you were 20 again.

FEATURES AND BENEFITS

- Helps to remove the advanced Glycation End Products.*
- Helps remove Lipofuscin.*
- Helps stem cells to operate at their optimum level.*
- Increases ATP-providing biological hydrogen to help amplify cellular electrical energy.*
- Helps boost your energy levels back to a more youthful self.*

These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any disease.

Youthful energy and vitality.

This is what sets the AGE Pill apart from other anti-aging products, into the realm of potential youthful regeneration. The AGE Pill provides three classes of advanced, specialized super-nutrients to the stem cells to delivering intense support for:

1. Removing glycation buildups that inhibit intercellular proteins.
2. Reduction of toxins and cellular sludge resulting from lipofuscin.
3. Significantly increasing ATP-providing Biological Hydrogen to greatly amplify cellular electrical energy. Theoretically, this process could increase electrical energy within the stem cells three or four fold, to where you may “feel like you were 20 again!”

Adenosine Triphosphate (ATP) and biological hydrogen are believed to be key in supporting the releases of vast stores of energy that are available to your body. Your new, elevated energy could help your cells to rebuild, rejuvenate and provide an environment to work at more optimum levels, potentially providing support to alleviate the ravages to our bodies that occur over our lifetime.

Be Young.
Be Happy.
Be You

The Science Behind The A.G.E. Pill

Our patented processes maximize The A.G.E. Pill's nutritional content, providing intense support for removing glycation buildup, reducing toxins and increasing ATP, helping you feel incredibly younger.

Beta-Alanine is a naturally occurring beta amino acid that helps the body to form a Carnosine, helping block the central changes to cells and tissues that result in aging. It also displays beneficial effects in boosting muscular performance, capacity and anaerobic endurance.*

Alpha Lipoic Acid is essential to cellular processes that convert biochemical energy from nutrients into Adenosine Triphosphate (ATP), and then release waste products. It also is known to reduce oxidative stress in the body via powerful antioxidant activity.*

L-Carnosine is a natural antioxidant and anti-glycation substance found in normal human tissues, that helps block the central changes to cells and tissues that result in aging and age-related complications.*

Betaine HCl is known for helping to reduce homocysteine levels in the blood, aiding to prevent hardening and blocking of arteries. Its ability to promote protein synthesis can help improve digestive function, process body fat, with detoxification and cellular functioning.*

Acetyl-L-Carnitine HCl, naturally present amino acids and antioxidants in the body that support mitochondrial function. They help to reduce free radical cell damage, when the body's natural antioxidant capacity gets low, and cellular energy production produces too many free radicals. They also help the body produce energy.*

L-5-Hydroxytryptophan is a naturally occurring amino acid that works in the brain by helping increase the production of serotonin. Serotonin production declines with age and stress affecting sleep, appetite, temperature, sexual behavior, and even pain sensation. *

Blueberry Fruit, one of the most nutrient-dense foods which contain large levels of a broad range of antioxidants. It helps reverse damage done by toxins and free radicals that promote cellular aging.*

This is My Business.

Live longer. Enjoy More!
