## How does AGE PILL WORK?

Adult stem cells are the natural renewal repair and rejuvenation system in our body.

If we need new muscle cells they can become muscle cells. If we need new heart, liver, brain or nerve cells they can become those too. And if we need to fight an infection or other condition in the body they can become the immune system soldiers. The various kinds of white blood cells.

**So why do we need the AGE PILL?** Our body is at it's best at around 25. The problem is after the age of 25 our stem cells begin to decline. So by the time we're about 60 we have about 90 percent less stem cells circulating than when we were in our our 20s. We become less than we once were.

When we were young we had plenty of adult stem cells in circulation. These adult stem cells helped us repair and renew and recover from injury and disease quickly. They helped us to feel alive, young, strong and invincible

With less repair men, due to a decrease in healthy stem cells, our tissues, our bones and joints, our muscles, our glands and our organs like our liver, kidney, heart, brain, pancreas, and digestive tract slow down and begin to wear out.

As we get older we suffer longer when we're injured it means we recover more slowly from illness or exercise we feel less well. We feel less flexible. We feel more discomfort and we feel less capable to do the things that we enjoy in life! Our cells and our body starts to degenerate faster than it can regenerate.  
**It doesn't matter how much we exercise or how well we eat, we cannot stop this from happening without some EXTRA HELP!**

Our cells are crying out for help! Help me! Help me! Why do our cells need help? Why do our cells wear out ? Firstly, cell waste (cellular sludge) builds up inside and outside of our cells.

You see when our cells create energy they also create waste. Waste known as lipofuscin. This waste accumulates over time. It happens faster than the body can get rid of it. But as we age we get hit by another type of toxic waste called glycation. This thick crummy sludge mucks up and damages the flow of activity within our stem cells.

This leads to increased cell stress, decreased energy production and eventually cellular death. Another name for this process, **getting old. In comes the AGE Pill.**

It's a little bit like bringing in the best team of repairmen and cleaners for your home. After they are finished your house looks and feels like new again, inside and out. The age pill helps by providing support to make the cells function more like they were when you were younger. The ingredients of the age pill work together to support a boost energy within every cell in your body.

The AGE helps to support the removal of the sludge, the cell waste inside and outside cells. With less cell waste and an increase in cell energy you could start to feel and look like a younger you.

The AGE Pill comes to the rescue of the “help me” cells. It supports the body and helps to improve stem cells so the body can naturally replace old sick or damaged cells in our body with fresh new young fully functioning cells.

As a result of this our body works and feels better in so many different ways. When this happens we feel better we can be more active, we can enjoy life more we become more vibrant and alive

## Age Pill Testimonial by Rick C. – 5th October 2018 – Oakey Qld. Australia

In June 2017 I was diagnosed with Melanoma and had one removed from my back. In August 2017 had some scans done and it revealed that I had 13 more melanomas. I started taking The Age Pill on around 15th October 2017 and had my next appointment in November 2017. I was told that one on top of my head had become smaller. So I told them that I would come back in January 2018 as I was trying something namely Fucoydon.

When I came back in January he looked at one under my arm and told me it was 2cm but in November it was 4cm so I said I will see you in April. In April he said it looked like the one under the arm had grown another node but I said I wanted to continue with what I was doing and said I will be back in July.

Scans revealed everything were getting smaller or disappearing altogether. I have Just left the Hospital 5th November 2018 cancer free no more visits for cat scans and fine needle biopsies. I am on my way home to celebrate.(please note this testimonial is Rick's own personal experience. We cannot say his results are because of the products. This may be been a lucky coincidence)

This is beautiful, Susan Komorowski. She has been on the AGE PILL and Transfusium for one year now. Doesn't she look amazing!

Anthony, Victoria. Australia

I've been on The Age Pill for 5 months and there has been a notable improvement in my skin, particularly the reduction of lines and under eye bags.

I've also noticed an improvement in my memory, which has become sharper. Overall very happy with the results and continuing with the addition of some other Sisel products – Fucoydon, Eternity and Spectramax.

I am a Type One Diabetic, 50 years old.  
Anthony

"Max has come such a long way and improved so much on the Sisel products. Who would have believed it possible. His rheumatologist says he is so good. Bloods have improved so much. The tests don't tell a lie. Doesn't he look great. 8 months on Sisel. How fantastic. Thank you Tom Mower as we are so grateful."

Hi Isabelle Im Kate. My hubby with his cancer takes the Triangle and the AGE. With the Triangle he takes 4 x 22ml doses of Fucoydon daily. It is a cancer killer and very important for recovery. This is him 6 months on Sisel and now he's doing great. Not bad for someone they wrote off.

**Debbie Moffat** He looks wonderful! Were you previously with Sisel before this? And how many bottles a month would that 88 ml a day be?  
Like - Reply - 48w

**Kate Brighton** Debbie Moffat makes originally took 220ml a day. 10 doses a day for 12 months.

## Marsha's Story

## Marsha's Story

“How I went from being close to needing a wheelchair and offered ‘medical retirement’ (age 43) to healthy & well and working full time, aged 45”...

My autoimmune story started in 2012 when I was 39 (prior to this, I had suffered depression and anxiety for many years). I first noticed my memory fading. After trying to ignore it, it started really concerning me. I couldn't remember people's names and found myself socially regressing.

Next, my neck started 'locking up'. My shoulders became hard and sore. I often became dizzy. To the point where I'd almost faint. I felt nauseous and had liver problems and terrible IBS too. I had severe insomnia. I'd sleep mildly for 2-3 nights per week. This was followed by severe chronic fatigue, tinnitus, hay fever, all-over-body trembling, involuntary 'tics' in my neck, brain fog and memory loss. I thought I had early onset of Alzheimer's! I couldn't handle lights and noise.

Then, I developed serious food allergies... The allergic reactions were very intense. To the point where I struggled to breathe and my face would swell. I was given steroids and hid from the world. I left my job as a sign language interpreter. I couldn't cope. My cognitive function was deteriorating. I started to get arthritis in my thumbs and psoriasis on my elbows.

My GP diagnosed me with 'some kind of autoimmune disease' 🙄 and I was given drugs for sleep, pain, anxiety & panic attacks, steroids for treating the allergic reactions, monthly B12 injections and antihistamines daily. Being a natural health & healing advocate since 2003, this did not sit well with me. My symptoms progressed and I was diagnosed with MS.

I was so sad that I couldn't run anymore and eventually walking became painful and would trigger my nervous system/neurological symptoms. I followed a 'wellness' program which included double dose of the AGE Pill for 10 months and fucoydon

Kate Brighton's testimonial on the A.G.E. Pill

"Almost 2 months taking 12 AGE pills a day. I am amazed as I looked at a photo taken 6 months ago. Everyone says I look fabulous but I didn't realise there was such a difference. Thankyou Tom Mower. You are an amazing person for what you do for others."

Before and Arno Moos.

A.G.E.Pill, Fucydon, SpectraMaxx and Eternity products for 15 days, and her secretions disappeared from her eyes. 👍

She said she loved Mr Tom Sr and Sisel too.  
Stella Kim

SISEL is great and the A.G.E. Pill is a true blast. These two pictures were taken in April 2017 and October 2017. Same room and position, similar lighting, zero filter and the result is almost incredible.

I was doing OK till August...then everything started to go backwards..And it's just the beginning. I am so excited by the months to come that I can hardly sleep. Thanks Tom Mower, thanks Sisel.

2 Months

3 Months

6 Months after starting Sisel AGE Pill

FIRMER SKIN, LESS FRECKLES, BRIGHTER SKIN ....29 DAYS

Skin changes I feel it looks clearer and firmer waiting for the big sunspot to disappear I think it's faded. Less freckles. No Filter Same Lighting. Zoom in take a look, actually it says day 28 but the first photo was taken August 2016 I was not taking the AGE and now I have been taking it 28 days so it's day 28 of taking it. Zoom in and look. I still feel even lighting to compare no filters, no makeup no bs.

I'M ABSOLUTELY ASTONISHED AT WHATS HAPPENING WITH MY BEST FRIEND **Ginger Camp Gonzalez** AND THE A.G.E PILL.

Ginger has been using Sisel products for 2 1/2 years now with incredible results reducing her meds from 23 to four, no Lupus flares, RA and Fibromyalgia under control. No longer pre diabetic and so much more. But adding the A.G.E pill 3 weeks ago has been life changing!!

Not only has she had increased energy but her life has become so different, for the last 8-10 years her lack of motivation kept her from doing the things she used to enjoy, she isolated herself away. Now she's going places and is motivated and wanting to enjoy life.

These pictures are a huge difference she sent this morning. I didn't even recognize her!! Just look at how her skin is brighter and younger looking and her eyes!! I'm just astonished!! **Tom Mower** you are a genius and we thank you from the bottom of our hearts for giving us our lives back !! First photo is December 2016 second is February 2017 and third today 8/20/17. Now what is everyone waiting for ???

Renata Vermillion Davis · March 31 · Fay, OK, United States  
This is my furbaby rhinestone and about three weeks ago he started having problems walking and was dragging his left hind leg. I took him to the vet and it was decided that he had nerve damage and him dragging that leg would lead to wound and infection and could possibly lead to amputation. I immediately went home and started him on the age pill because I have seen so many post with it helping other animals. After the first week he was starting to get his left foot straightened out and under him again. He has been on the age pill for 3 weeks and he is getting better at climbing on the bed and running a little. He still has a ways to go but his progress is amazing! I can't express how grateful I am with his progress. He doesn't mind taking his medicine because he gets it in a treat. Thank you sisel for making such an amazing product.

AGE PILL health support for cats says:

Carolyn Ayres I have given to cats. I woke up one morning and one of mine obviously had an infection, eyes streaming nasty green mucus bubbles from his nose sputtering and breathing through his mouth, I mixed up one age pill in a very small amount of stock by small I mean 5mls and gave him half in the morning and the rest in the evening, next morning eyes were clear and no longer streaming repeated it that day and the following day even though third day he had no symptoms that was a few months ago. He didn't need it 4th day. All four of mine are 15 about 10 days ago I started sprinkling the contents of 1 pill between them on their food every other day in the evening, I have noticed they are out in the garden more, starting to groom themselves more and noticed my white cats ears are starting to heal, he had some growths on them which I fear could be cancer, lumps gone now, went black and fell off so just watching and waiting now

You, Sandy Biltoft, Susie Beveridge and 44 others

## A.G.E Pill Testimonials & Reviews

Keith Wilkins

3 months on the A.G.E Pill and my hearing has improved so much there is now no need for a hearing Aid.

- I am 5 kgs lighter and this is the first time in 35 years that I have been under 100 KGs
- Can do 60 push ups on the floor with 3 reps of 20. 3 months ago could not do one.
- Uninterrupted sleep night after night.
- Skin is much smoother.
- Improved strength in all departments.

I think this is pretty good for 68 year old.

Thanks to Tom Mower and his magical Sisel products.

nds when in the  
of the dermatitis

These are my hands today. After started in AGE pill  
back on 12 caps a day in April 2019.

After only 4 weeks on the A.G.E. pill

I was not expecting results this fast! The pictures on the left were taken on August 1st, the day I began taking it. I was going to post my results after 3 months but what I see already is nothing short of amazing!

My first week my energy level and metabolism were that of when I was much younger. I am always hungry yet I have lost almost 10 pounds, something I had tried to do for the last year but failed.

I had my wife take the pictures on the right on August 29th just to see what, if anything, had changed on the outside. My skin is definitely tighter and the scar on my head is disappearing but the pictures of my hair amazed me the most! The gray is disappearing and the hair that started leaving in my late 20's is coming back. Thank you Tom Mower Sr. for such an awesome product!

Tom Mower Sr. President, co-founder and chief scientist of Sisel. Tom has been taking the Age Pill since it was formulated (12 a day).

He shared the following on a call in 2018.

“I never have to worry about eye glasses again. My vision has improved and now it has been tested it is now 20/20.

I had the best hearing aids but I don't need them, now they are expensive memorabilia.

it wasn't suddenly it took 5 or 6 months.

My muscle has come back and my hair colour has started to come back, it is mostly dark now. “

Two super important things you need to know to get maximum results with Sisel's AGE Pill

# BODY WATER

## INFOGRAPHICS

People should drink a day for at least 6 glasses of clean and fresh water. Water balance of a person - this is a very important parameter, since the liquid is the basic foundation of any cell.

# TRUTH is in Water

70% Water Volume in your Body

Your Weight Daily intake of water

Drink plenty of water. The ingredients in the AGE Pill require water to activate.

**FROM Tom Mower, President of Sisel International. Product Inventor and Chief Scientist.**

To increase the amount of NAD it has to be converted to another compound called ATP and that requires a methyl donor that's a compound you can find it in dark green vegetables, broccoli, spinach, avocados things like that.

If you don't have enough in your system all of the NAD will be exhausted which means there will not be enough to be converted down the cycle into ATP. (eg you won't get good results with the AGE Pill).

So if you are having any of that tiredness or fatigue when starting the AGE Pill, do one or two things start eating spinach, broccoli (dark green leafy vegetables), avocados so you can get more within your system. If that is not enough to get it up you can go to the store you buy something that's got a methyl donor in it.

Loose methylfolate once inexpensive and it can work for you and do a good job. It's not folic acid it's methylfolate so make sure that you get it right one. I Fully active folate provided MTHF (5-methyltetrahydrofolate) the folate form most directly required for DNA regulation and other fundamental metabolic processes.

Thank you for reading these testimonials.
